

Pier System

Inspired by the magic of a composed wall, French designers Ronan & Erwan Bouroullec, wanted to create a storage system that offered the artistic potential of an open shelving solution, along with a flexible design that could adapt to modern lifestyle requirements. The result is Pier System – a multifunctional storage system for organising and storing a multitude of items, available in a large variety of set configurations that can be combined with each other. Elements that are part of these configurations can be moved around as needed and desired. Its flat-pack design and easy assembly enables it to be moved and modified to suit infinite environments and functions – from workspaces to bedroom wardrobes and hallway organisation at home.

Pier System Design by Ronan & Erwan Bouroullec

Ronan & Erwan Bouroullec the Paris-based design brothers from Brittany have been working together since 1998. Ronan is a graduate of the École Supérieure des Arts Décoratifs in Paris and Erwan attended the École Nationale Supérieure des Arts in Cergy before starting their own studio.

They have transformed the design industry and offered new perspectives of materiality and purpose. For HAY, they have designed the Palissade Collection, Copenhague Collection, Can Sofa, Élémentaire Chair, Passerelle Table and Pier System.

Ideal for storing and organising books and music or showcasing ceramics and other decorative objects.

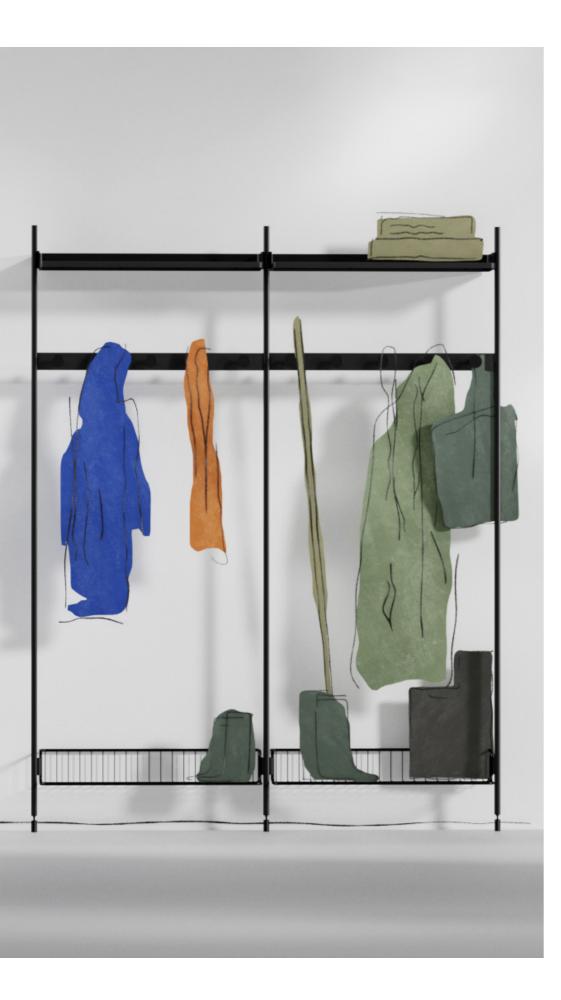

Constructed from lightweight aluminium and steel and available in different colour options.

Pier System is a multifunctional storage system developed to accommodate and adapt to modern lifestyle requirements.

Available in a large variety of set configurations that can be combined with each other.

The system consists of profiles, shelves, coat racks, work shelves, cabinets and wire shelves.

Numerous work, wardrobe or organisational functions can be incorporated.

Living Room

The flexible system is ideal for using in the living room, where the open-design units can be used for storing and organising books and music or showcasing ceramics and other decorative objects. The set configuration options provide users with extra functionality – such as creating a home office with work shelf compartments or closed cabinets for concealing items. Pier System's choice of colours and versatile design offers a large number of possibilities, enabling users to create a personalised and multifunctional shelving system that fits their living room universe.

The flexible system is ideal for using in entrance halls and hallways, where the open-design units can be used for hanging outerwear, storing shoes and organising smaller items. The set configuration options provide users with extra functionality – such as coat racks and wire shelves for more efficient storage and separate closed compartments to conceal clutter. Pier System's choice of colours and versatile design offer a large number of possibilities, enabling users to create a personalised and multifunctional shelving system that is suitable for both compact hall spaces and larger entrance halls.

Wardrobe

The flexible system is ideal for using as a wardrobe, where the open-design units can be used for organising clothes, shoes and other accessories. The set configuration options provide users with extra functionality – with the coat rack offering plenty of space for hanging clothes, shelves for folded items and wire shelves for underwear or smaller items. Pier System's choice of colours and versatile design offer a large number of possibilities, enabling users to create a personalised and multifunctional shelving system that is ideal in a bedroom or studio apartment.

Pier System 1002 | PS Black powder coated shelves | Black anodised profiles

Workspace

The flexible system is ideal for using as a workspace, where the open-design units can be used for organising books and other files, with integrated work shelves for displaying computers, as well as closed cabinets for storing stationary and other office items. Pier System's choice of colours and versatile design offer a large number of possibilities, enabling users to create a compact workspace in any room at home, as well as a larger set-up with multiple workstations in an office or corporate environment.

Kitchen

The flexible system is ideal for using in the kitchen, where the open-design units can be used for displaying tableware and utensils and storing dry food in glass jars and containers. The set configuration options provide users with extra functionality – with additional shelves or closed cabinets for extra storage, as well as work shelves for creating an integrated workspace into the kitchen area. Pier System's choice of colours and versatile design offer a large number of possibilities, enabling users to create a personalised and multifunctional shelving system that is ideal in an open kitchen or studio apartment.

PIER SYSTEM

DESIGN BY RONAN & ERWAN BOUROULLEC, 2022

Designed by French designers Ronan & Erwan Bouroullec, Pier System is a multifunctional storage system developed to accommodate and adapt to modern lifestyle requirements. Featuring a flat-pack design that is easy to assemble, reconfigure and recycle, the simple construction provides a flexible shelving solution for organising and storing a multitude of items. Constructed from lightweight aluminium and steel using the minimum number of components required to create a complete storage system, Pier System is available in a variety of colours and set configurations that can be combined with each other. Elements that are part of these configurations can be moved around as needed and desired, enabling the user to incorporate work, wardrobe or organisational functions into most rooms and environments, from living rooms and bedrooms to entrance halls and office areas.

HIGHLIGHTS

- · Multifunctional modular storage system designed to accommodate and adapt to modern lifestyle requirements.
- ·Flexible design enabling it to be extended, moved, or modified to suit infinite spaces and functions.
- · Constructed from lightweight aluminium and steel using the minimum number of components required to create a complete configuration.
- ·Flat-pack design that is easy to assemble and reconfigure.
- \cdot Suitable for a wide variety of private and public environments.
- · Qualified for contract use.

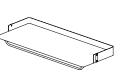

DIMENSIONS

PARTS

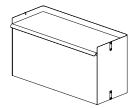

SHELF WIDTH 79 CM DEPTH 31 CM HEIGHT 6 CM INNER DIM. W76,5 X D30 CM

MATERIAL | Punched and bent powder coated sheet steel. Aluminium connectors. MAX LOAD WEIGHT | 15 kg evenly spread across the surface.

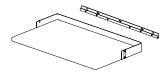

SHELF WITH HANGER WIDTH 79 CM DEPTH 31 CM HEIGHT 10,5 CM INNER DIM. W76,5 X D30 CM

MATERIAL | Punched and bent powder coated sheet steel. Chrome plated steel rod hanger. Aluminium connectors. MAX LOAD WEIGHT | 15 kg evenly spread across the surface.

CABINET WIDTH 79 CM DEPTH 33,5 CM HEIGHT 41,5 CZM INSIDE DIM. W75 X D27,5 X H34,4 CM INNER TOP DIM. W76,5 X D30 CM

MATERIAL | Punched and bent sheet steel. Door in aluminium with a magnet closure. Aluminium connectors. MAX LOAD WEIGHT | 15 kg evenly spread across the surface. 30 kg for the whole cabinet.

WORK SHELF | WORK SHELF BRACKET WIDTH 79 CM DEPTH 46 CM HEIGHT 6 CM INNER DIM. W76,5 X D45 CM

MATERIAL | Punched and bent powder coated sheet steel. Powder coated sheet steel wall bracket. Aluminium connectors. MAX LOAD WEIGHT | 15 kg evenly spread across the surface. C C C C C C

COAT RACK WIDTH 79 CM DEPTH 11 CM HEIGHT 6 CM KNOBS DIM. 4,5 CM

MATERIAL | Die cast aluminium knobs. Aluminium extrusion. Aluminium connectors. MAX LOAD WEIGHT | 15 kg evenly spread across all the knobs.
